Depok, Indoensia

I'm Diaz Eka Cipta, a recent graduate with a degree in Information Technology from University Bina Sarana Informatika. I am a Frontend Developer specializing in creating responsive and user-friendly websites. I have hands-on experience with React, JavaScript, Bootstrap, and Tailwind, and I'm skilled in turning designs into functional web applications. My goal is to build efficient, visually appealing websites that offer a great user experience. I have developed a portfolio showcasing my work and completed projects that demonstrate my technical abilities. Let's collaborate on your next project!

Work Experiences

PT.Prima Layanan Nasional Enjiniring - Indonesia   Aug 2022 - Dec 2022

Assistan Officer Teknologi Informasi

PT. Prima Layanan Nasional Enjiniring (PLNE) is a leading engineering and technology solutions provider based in Indonesia. Specializing in electrical, mechanical, and telecommunication services, PLNE offers a wide range of solutions to support infrastructure development, energy management, and industrial systems. With a strong focus on innovation and quality, PLNE delivers cutting-edge engineering services to meet the evolving needs of its clients across various industries.

- Website Development: Contributed to the development of the internal website Mrapat, which was designed to help manage employee attendance, meeting schedules, and meeting notes. The website also includes a dedicated note-taking feature to document the meeting outcomes. The meeting results are shared with the attendees for future evaluation. In the development of this website, employee awareness of meetings increased by 85%, reducing issues related to attendance, meeting schedules, and participation in meetings.
- IT Operational Activities: Involved in IT operational activities, such as enhancing meeting rooms and ensuring IT equipment functions properly, providing practical experience in supporting the company's technology infrastructure.

Education Level

Universitas Bina Sarana Informatika ⊘ - Indonesia   Jan 2019 - Mar 2024

Bachelor of Information Technology (IT), 3.60/4.00

- I have previously participated in the CCNA v4 program, where I gained valuable knowledge in networking and Cisco technologies.
- I have participated in the Kampus Merdeka internship program, which provides opportunities for students to engage in internships, industry collaborations, and community-based activities. In addition to learning about the company, I also gained knowledge in website development and IT support, such as assisting office employees with issues related to their devices. While working on the company's internal website, I used PHP programming language with the Laravel framework. The impact of the Kampus Merdeka program has been significant for me, as it has prepared me to face the workforce with more confidence. Moreover, it has allowed me to build valuable connections and learn many practical skills that are not taught in university.

Skills, Achievements & Other Experience

- **Soft Skills** (2022): Problem-Solving Skills : The ability to approach complex situations and find practical solutions, whether independently or in collaboration.
- **Soft Skills** (2022): Communication Skills : The ability to clearly and effectively convey information, whether in writing, speaking, or presenting.
- **Soft Skills** (2022): Teamwork and Collaboration : Working effectively with others to achieve common goals while respecting different viewpoints and skills. Examples: Cooperation, flexibility, and ability to work with diverse teams.
- **Hard Skills** (2024): I specialize in React, JavaScript, Bootstrap, and Tailwind.
- **Projects ⊘** (2024): Developed responsive and interactive websites using HTML, CSS, React.js, Vue.js, Next.js, Bootstrap, and Framer Motion, optimizing performance, UI/UX design, and animations. Managed version control with Git and deployed using Vercel. Visit my portfolio website
- **Projects ⊘** (2024): I am currently in the process of developing my personal eCommerce website. The project is still under development, and I'm working on refining the features and design to provide a seamless shopping experience. For the frontend, I am using React, Vue, Next.js, and Tailwind CSS, while the backend is powered by Express.js and MongoDB. Additionally, I am integrating Stripe as the payment gateway to enable secure transactions.
